Pages 75 and 138

Question 9.4, Task 3 & answer

An additional note has been added pointing out that although figures in the table should be shown where appropriate to two decimal places, the actual calculation should be carried out using as many decimal places as the calculator will allow. There may therefore be some variations in student answers in the 'Birds' column.

Question 5.5 answer

The headings to the second and third columns of the table should be 'Cutting' and 'Assembly' in line with the question.
